

Currimjee Informatics Ltd successfully delivered HP Non-Stop system at Payment Exchange Ltd: A system that simply does not fail

Payment Exchange (PEX) was founded in early 2008 and is the first Third Party processor in Mauritius. PEX offers high-level expertise in all areas of e-payment, provides banks, the retail industry and financial institutions with complete certified solutions to SmartCard technology.

HP Non-Stop server: Powering world class payment infrastructure system

"To power such a world-class payment system infrastructure, we need the best of the breed solutions, including a server having absolute availability and reliability, redundancy, scalability, security and a proven track record", asserts Mr Sailesh Sewpaul, CEO of PEX.

Indeed, to remain competitive, financial institutions must be able to offer to their customers the immediate services they require and leverage their assets to the fullest extent. This means that the IT systems should deliver continuous availability for its mission critical applications.

"The best solution was the HP Non-Stop server. Apart from complying with all rigorous technical specifications, HP also has a proven track record on supporting switching platform system. Moreover, the 5 largest U.S. banks are running on HP Non-Stop server" adds Mr Sailesh Sewpaul.

The redundant Non-Stop system is a self-healing server that detects faults as they occur, deactivates affected components, reconfigures itself automatically and continues operation free from any disturbance. HP Integrity Non-Stop servers can offer availability ratings of up to 99.99999 percent. Statistically speaking, the downtime then only amounts to three seconds per year!

HP Non-Stop servers process more than 60 percent of the world's equity (stock) transactions including the NASDAQ and provide transaction processing for more of the world's exchanges than any other platform!

Currimjee Informatics Ltd: The only Non-Stop Technology provider in Mauritius

"We choose to partner with Currimjee Informatics Ltd to implement this solution because they are the only certified Business Partner in Mauritius with a proven track record in HP Non-Stop technologies" says Mr Sailesh Sewpaul.

Currimjee Informatics Limited is a leading provider of Information Technology Solutions for the businesses in the Indian Ocean and the Middle East region. They have a market presence of more than 20 years of experience in the field of Information and Communication Technology with a customer portfolio ranging from medium to large organization.

Their products and services offerings include:

- Corporate Performance Management Systems (Business Intelligence, Enterprise Planning and Consolidation)
- Enterprise Resource Planning Solutions
- Infrastructure Services (Outsourcing and Managed Services, Business Continuity Services, Enterprise Collaboration Services)

Mr Sailesh Sewpaul

"We needed the best of the breed solution and the best choice was the HP Non Stop server"

This computing platform is the server of choice for mission-critical applications that simply cannot fail.
