MICROS-Fidelio Financials  
Now there's a smarter way to see  
how well your hotel's running

Wouldn't it be great to see what's going on everywhere in your hotel – 24 hours a day. Imagine what that visibility could tell you about your productivity, efficiency and profitability. With MICROS-Fidelio Financials, it's as if you can. Making you and your hotel that little bit smarter.

We know and understand what working in a busy hotel environment is like. We know the demands that are made on your time from the many outlets that come under your control, yet also understand the pressures to run as efficiently and profitably as you can. To do this you need instant, open access to the financial performance information your systems hold.

MICROS-Fidelio Financials does just this. It gives you an instant visibility on the profitability of every outlet in your hotel. Key performance indicators such as gross operating profit per average room, revenue per average room, total revenue per room, breakeven occupancy levels or the profitability of a particular outlet are delivered to you enabling you to make instant decisions regarding pricing and resourcing levels, directly influencing your profitability and efficiency.

And what's really smart is the ability to deliver key financial information to you either at the touch of a button, or at a pre-defined time and frequency of your choosing without you having to ask for it, in the format of your choice, whether that be via E-mail or more in line with your hectic daily schedule, by SMS text message direct to your mobile phone or to your PALM. Exactly what you want, when and how you want it.

With over 20 years experience in the hospitality industry and with a variety of customers in more than 180 countries worldwide, including names such as Marriott, Le Méridien, Hilton and Raffles, we are sure that we can make your hotel a smarter hotel.
