Innovation :: Experience :: Service :: Expertise

About Us

Currimjee Informatics Limited is a leading provider of Information Technology Solutions for the businesses in the Indian Ocean and the Middle East region.

We have a market presence of more than 20 years of experience in the field of Information and Communication Technology and our customers are from leading medium to large organisations.

Our company is built on four fundamental principles:

Innovation: We are dedicated to bring in new technology and best practices to the market to enable our clients' business to become more competitive.

Experience: We have successfully implemented a number of mission critical projects over the last 18 years and we have experience in various industry-based solutions.

Service: Our business is geared at satisfying our clients' needs; to this end our highly trained, customer oriented team provide a range of service from pre-implementation to after sales support together with training facilities.

Expertise: As a total solution provider, we have a team of dedicated and certified professionals with years of experience in implementation of high-end business solutions.

Our product and service offerings include:

- ***Corporate Performance Management Systems***
- ***Enterprise Resource Planning Solutions***
- ***Infrastructure Services***

Being committed to quality, our company is certified BS EN ISO 9001:2000 by BSI (British Standards Institute). We comply with international standards and best practices so as to deliver superior value and quality services to our customers and thus ensure their satisfaction.

Corporate Performance Management Solutions

Our Corporate Performance Management Solutions help you decide what to do to improve yours, your team's and your company's performance.

Employees, Managers, and Executives need up-to-date information pertaining to how their Key Performance Indicators are performing against corporate goals and objectives.

To meet this challenge, leading organizations turn to Corporate Performance Management as a means of gaining visibility into their organizations, transform strategy into an actionable plan, aligned with day-to-day tasks and communicated organization-wide.

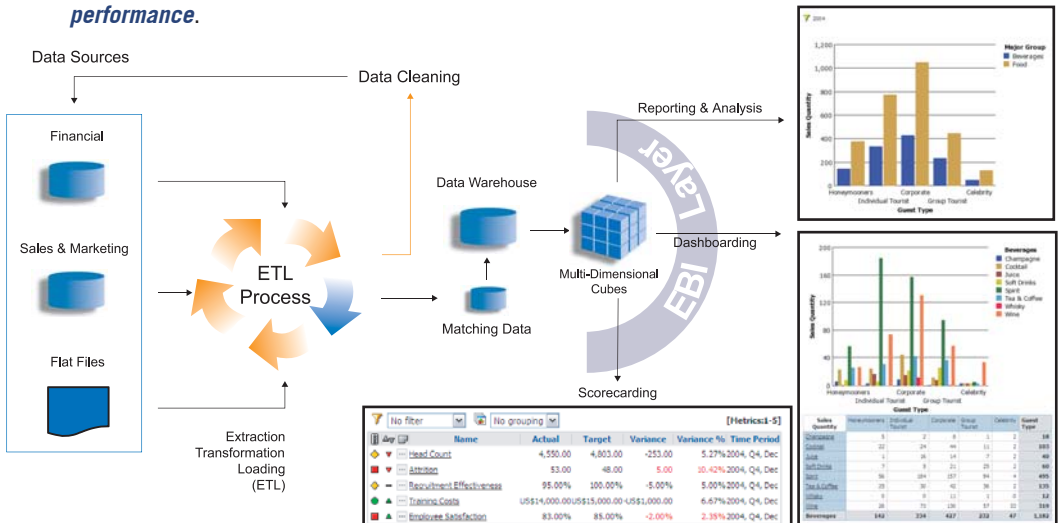

Our Corporate Performance Management solutions include:

• Business Intelligence

Delivers the information framework that lets anyone in the organization understand **corporate performance** from any angle and to any depth to facilitate decision making. Firms employing BI can effectively **communicate strategy on a real-time basis** firm wide through a combination of **dashboards**, **event-driven reporting** and **report alerts**.

• Enterprise Planning & Consolidation

Enables organizations to turn carefully crafted strategies and objectives into discrete plans, budgets, and forecasts. It allows organisations to build dynamic, interconnected business models that deliver better predictability and vastly improve the ability to **manage performance**.

Enterprise Resource Planning (ERP) Solutions

Our ERP solutions cover critical functions for financials, human resources, sales and marketing and the production environment of an organization. They allow capturing of transactional data and make key operational processes more efficient.

Our portfolio of ERP solutions include:

- **Financial Management**

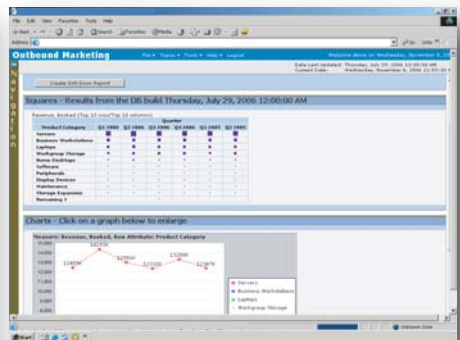

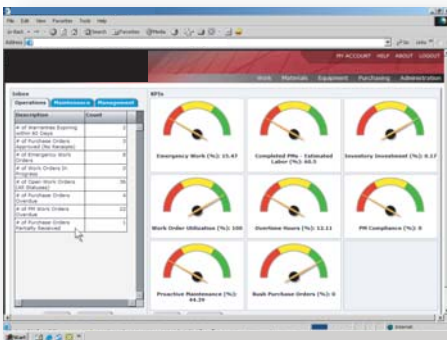

Provides flexibility to handle financial requirements from financial accounting and budgeting to reporting and analysis.

- **Enterprise Asset Management**

Allows companies to effectively monitor and manage the deployment, performance, and maintenance of equipment, machinery, facilities, fleets and other capital assets.

- **Human Resources Management**

Helps companies move with all the ease of use to manage all aspects of employee life cycle, payroll, leaves, time attendance, training, and much more.

Infrastructure Services

Our Infrastructure Services are designed to help your organization focus on your core business activities, while we take care of your infrastructure requirements. We implement dynamic solutions using blade, non-stop, storage, virtualisation and monitoring technologies. Our offerings include:

- ***Outsourcing & Managed Services***

Reduce IT expenses by automating, integrating and optimising processes.

- ***Business Continuity Services***

Ensure proper security of the organisation's critical applications and data as well as to provide quick disaster recovery in the event of an unexpected breakdown.

- ***Enterprise Collaboration Services***

Include audio and video collaborative solutions to enable people to connect anytime, anyplace and with any device in a virtual experience as natural as being there.
