Monitor and Secure your IT business with our end to end packaged solutions

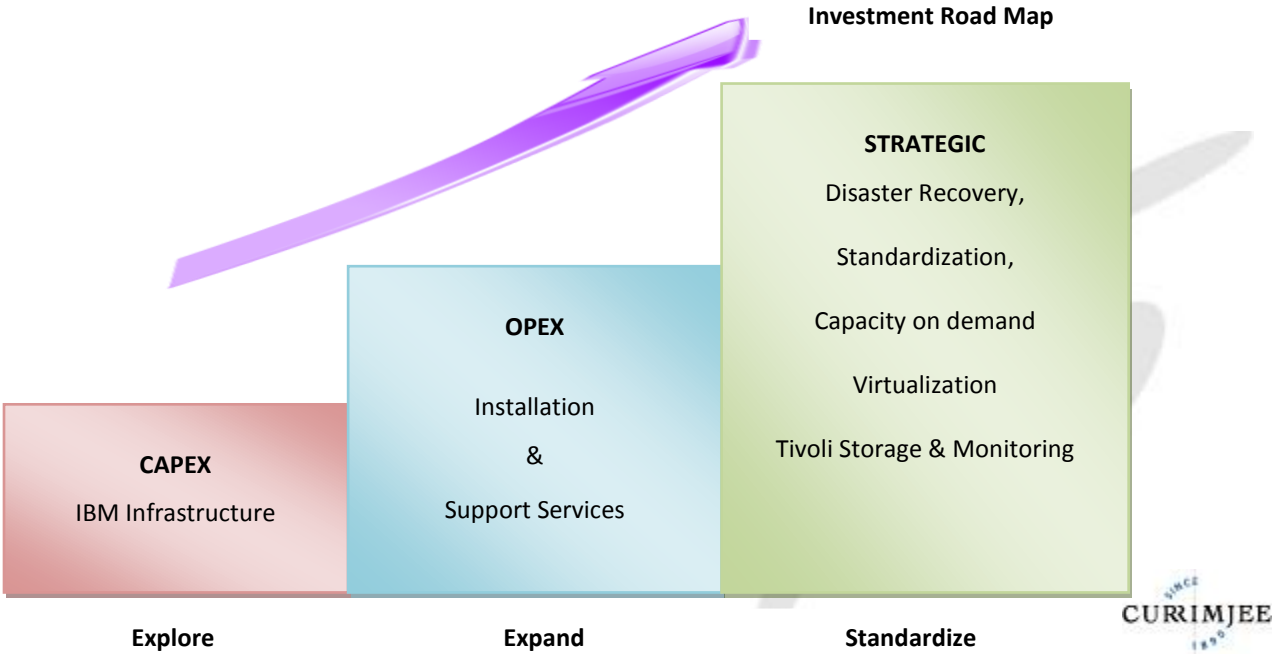

www.currimjeeinformatics.com

If your IT Systems are experiencing performance problems or failures, Currimjee Informatics Storage and Monitoring solution can help you to identify and diagnose the source of the problem, and make the appropriate changes to improve the bottlenecks.

By using the monitoring technologies, Currimjee Informatics certified experts can pinpoint bottlenecks and troubleshoot performance problems which help improve IT Business Continuity and performance by providing deep-dive real-time problem detection, analysis and repair. Diagnosis is improved and your IT Administrator can identify and take proactive measures in order to reduce downtime. Service Level Agreements can be maintained easily with tools to help you determine service level baselines and alert you as problems occur.

Our Storage Solution Package protects you from the risks of data loss and helps you reduce complexity, manage costs and address compliance with data retention and availability requirements.

Our solution strategy is to provide a one-stop shop based on partners technologies as follows:

CURIMJEE INFORMATICS ®

Solutions *for* Corporate Business

The key benefit realized by our customers is the shorter time needed to find and fix problems.

This enables your IT team to focus on core activities instead of working on ones already in production by automating certain tasks like resource allocations.

This combination of storage and monitoring solution bundled with the right infrastructure and recommendation will help you:

- Have a single portal to manage heterogeneous infrastructures
- Reduce operation time in isolating and diagnosing the problem
- Reduce your backup and recovery time
- Proactive management of the availability of your IT
- Better control of storage management cost
- Customize reports of your production environments

With our storage and monitoring package, your IT business infrastructure will operate and grow more efficiently through better visibility.
