

Infor FMS SunSystems for Hospitality

➔ More than 1,500 full-service and 700 local/independent properties depend on Infor FMS SunSystems for financial management, business intelligence, and reporting and analytics.

The choice of enterprising hospitality providers.

Without an effective financial solution, costly inefficiencies can eat away at your profitability. Therefore, having a powerful financial management system (FMS) that is focused on your business issues, whether it be for a single property or within a multi-property environment, is critical.

For more than ten years, Infor™ FMS SunSystems for Hospitality has been helping some of the world's most successful hotels and resorts integrate and streamline their business processes to improve visibility and profitability. By choosing Infor solutions, these leaders achieve a reliable, apples-to-apples view of financial performance across the entire enterprise, as well as the flexibility and control necessary for adapting to the demands of even the most challenging business environment. With more than 2,200 hotel customers and a global network of dedicated partners and professionals with industry experience, Infor delivers the solution of choice for the hospitality industry.

Designed specifically for your business.

Infor FMS SunSystems has been designed specifically to meet the fundamental requirements of your hospitality business model. The core solution includes:

- Predefined chart of accounts that adheres to hospitality standards
- Predefined analysis, with departmental structures and management reporting lines created and an enhanced analysis structure on the general ledger
- Report pack, including standard operational and management reports, key performance indicators, and powerful analysis functionality
- Interfaces to other critical hotel systems including PMS and POS.
- Pan-application reporting ability using intuitive report-writing tools.

Reporting tailored for your users.

Infor's financial solution for hospitality enables you to quickly design and deliver operational and management reports based on a single data source. The software's intuitive, easy-to-learn toolset makes it easy to gain control over your financial information. Combine the ease and flexibility of Microsoft® Excel® with the integrated security functions in Infor's software to quickly create your own professional-looking reports. Further, your reporting can be multilayered, enabling you to deliver information to meet the requirements of hotel owners, franchise operators, managers, and staff.

Analysis for business insight.

Infor FMS SunSystems helps you gain greater control of your business by promoting a thorough understanding of what is happening, as it happens. With Infor's application, you can measure and track key performance indicators by business and property at will, helping you to identify trends, uncover problems, and recognize opportunities. The software also can generate alerts that highlight and define exceptions within processes, enabling your staff to address issues immediately.

Support for your global operations.

Infor FMS SunSystems offers a variety of capabilities to help you facilitate the smooth, profitable operation of your property, including:

- Ease of Implementation – reduces time to return on investment. The deployment of this proven, pre-configured solution also reduces the risk of failure.
- Flexibility – allows the application to be configured easily to match your organizational structures and processes.
- Integration – allows interfacing with critical property systems.
- Scalability – supports a single user up to thousands of users.
- Single Product Set – decreases risks of failure and support issues because there is a single product set, not a different version for different countries.
- Euro and GAAP Compliance – allows you to confidently meet statutory requirements.

- Multiple Currency Support – simplifies management of currency complexities, enables day/period rates to be set in as many currencies as required, and provides support for operations in any country.
- Multiple Languages – offered in 31 languages that can be used within the same installation to support users of different nationalities.
- Support – meets your needs locally and globally by mobilizing our global direct and indirect infrastructure. In addition, our partners add value by understanding local legislation and cultures.
